*Provisions cited below are requests only and do not equal final authorizations or funding.*

**Summary funding:** The president’s budget requests \$773B for the Department of Defense (DoD). This is an increase of 5.75%, or \$44.5B above FY22 enacted levels. The late release of the President’s Budget was due, in-part, to the extremely late FY22 appropriations legislation in which the federal government operated under a continuing resolution for the first six months of FY22. This has caused a cascading effect on the rest of the cycle, delaying normal FY23 NDAA and appropriations processes.
