

Joint Operation Priorities

NGAUS Industry Day

11 December 2018

Major General Giselle M. Wilz
Director, Strategy, Policy, Plans and International
Affairs

Cyber: Remains A Growth Industry

- **Ferguson, Missouri; Baltimore, Maryland; and Flint, Michigan have all had cyber activity associated with these civil unrest events.**
- **Expect every civil support/domestic operations mission will have a cyber component that must be managed by civil and military leaders.**
- **National Guard is being included in national plans for whole-of-government response to cyber threats**
- **2018 Election Support – National Guard combined with 27 States and Federal partners**

NG CRE Future Capability Enhancements

Leveraging Joint Program Executive Office; Joint Chemical, Biological, Radiological, and Nuclear Advanced Capability Sets; and Enhanced Capability Demonstrations program to evaluate technologies.

- **Physiological Monitor**
- **National Guard Chemical, Biological, Radiological and Nuclear Response Enterprise Information Management System**
 - Integrated Sensor Management
 - Software and Hardware Tools
 - Enable Tactical Level Common Operating Picture Display, Information Management and Sharing Across the National Guard Chemical, Biological, Radiological, and Nuclear Response Enterprise
- **Radiological Screening Portals⁴**

The Non-Federalized Response

- **Emergency Management Assistance Compact processes work well in small to medium disasters**
- **Need new strategies at the National Level on how to conduct a response to territories, remote states, and states degraded by the circumstances**
- **Rapid reimbursement from Federal Emergency Management Agency to reduce supporting states fiscal stress**
- **Emergency Management Assistance Compact process during catastrophically disabled state governments**

Questions/Discussion
